A Self-taught **Front-end Programmer** who is motivated to learn new skills and take on new challenges at the next level of his web development carrier.

I started my career as a civil engineer. About two years ago, I decided to take a new direction in my career, I started my learning journey in web development. I acquired the basic tools of web development through my own projects, such as **HTML**, **CSS**, **Bootstrap**, **JavaScript**, and I've done some projects with **React** and **TypeScript**. Projects in the "Technical Projects" section helped me to strengthen and enhance my knowledge.

Skills

HTLM | CSS | Bootstrap | Tailwind CSS

JavaScript | TypeScript | React | Redux

NodeJS | WebRTC | Express | Socket-io | Rest-API

MongoDB

Technical Projects

Random user generator

- Developed an application that allows user to make **API calls** and edit the data received.
